DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2, 3, 4, 5, 6, drawn to a sealing tape dispenser comprising a linkage with a cam, cam lobe and an actuator, classified in class 225, subclass 60.
 - II. Claims 2, 4, 7, 8, 9, drawn to a sealing tape dispenser comprising an operating lever with an arm cantilevered, link pivotally connected to the arm, cam arm, classified in class 225, subclass 60.
 - III. Claims 2, 4, 7, 10, 11, drawn to a sealing tape dispenser with the operating lever is blocks the top cover when in the vertical position, classified in class 225, subclass 60.
 - IV. Claims 2, 4, 7, 10, 12, drawn to a sealing tape dispenser with the operating lever causes a magnetic interlock to be open, classified in class 225, subclass 60.
 - V. Claims 13-14, drawn to a tape dispensing apparatus with a roller movably connected to the frame to the move relative to the frame, classified in class 225, subclass 60.
 - VI. Claims 15-16, drawn to a method of tape dispensing, classified in class 225, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 3724

2. Inventions of groups I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the invention of group I has separate utility such as it could be used without the magnetic interlock of Group IV; conversely, the invention of Group IV has separate utility such as it could be used without the cam lobe and actuator of Group I. See MPEP § 806.05(d).

3. Inventions of Groups I-IV and V are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). For example, the combination as claimed does not require the particulars of the subcombination as claimed because the combination can be used without the roller movably connected to the frame to move relative to the frame. The subcombination has separate utility such as it could be used without the actuator connected to the cutting blade for actuating the cutting blade to cut dispensed material, cam lobe, spring and magnetic interlock.

4. Inventions of Groups VI and I-V are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). For example, the process as claimed can be practiced by another

materially different apparatus such as an apparatus not having the specific cam lobe, and the magnetic interlock.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
